

Assignment -3 Cloud Application Development

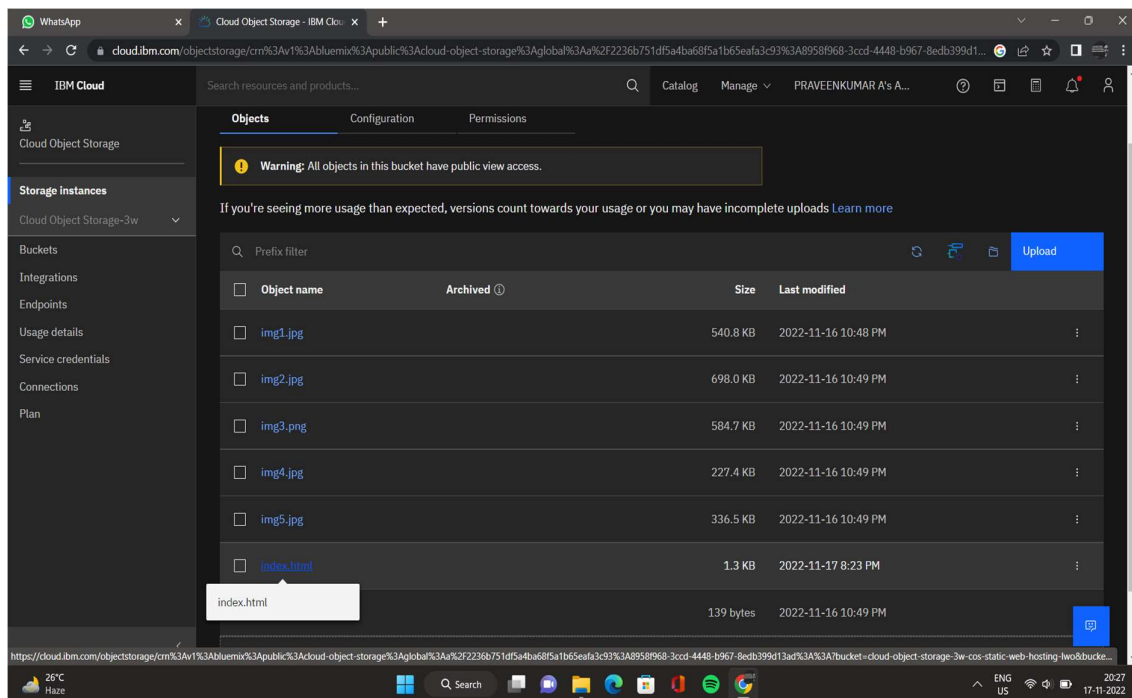

Question-1: Create a Bucket in IBM object storage

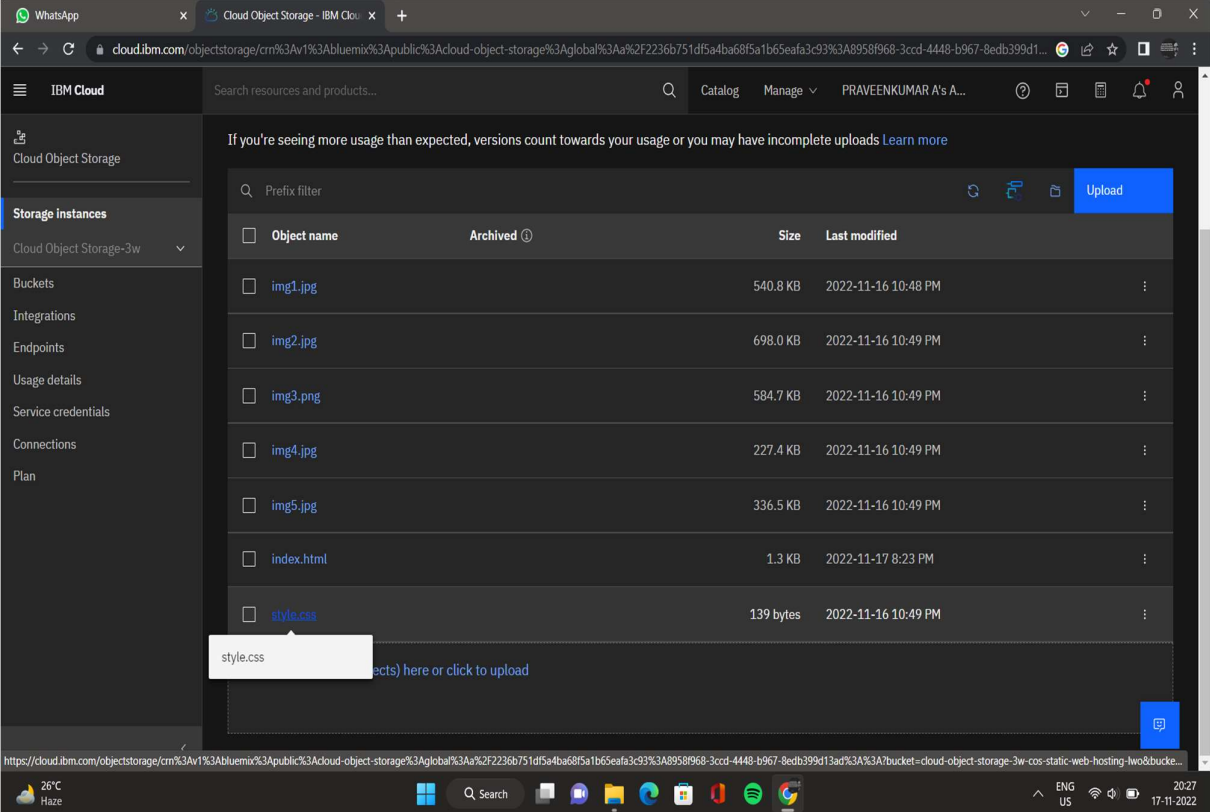

The screenshot displays the IBM Cloud Object Storage console. The left sidebar shows the navigation menu with 'Storage instances' selected. The main content area is titled 'Buckets' and includes a description: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a table listing existing buckets. A 'Create bucket' button is visible in the top right corner of the table area.

Question-2: Upload 5 images to IBM object storage and make it public. Write html code to display all 5 images.

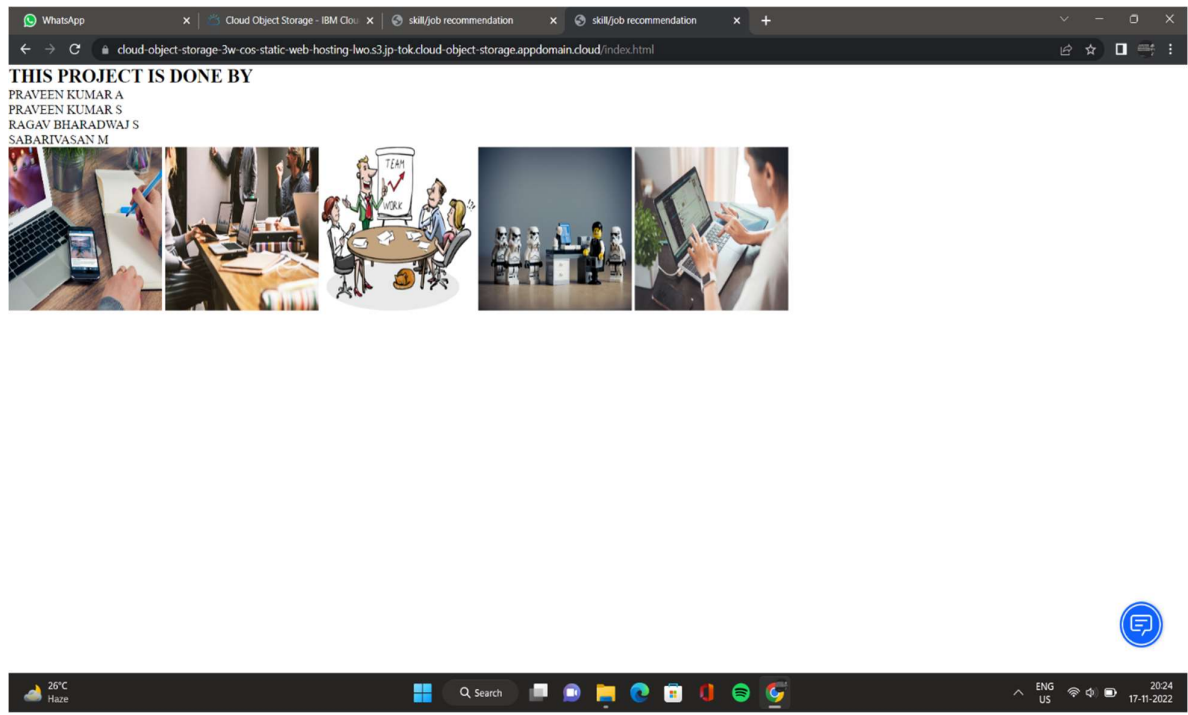

Question-3: Upload a CSS page into the object storage and use the same page in your html code.

The screenshot displays the IBM Cloud Object Storage management interface. On the left, a sidebar contains navigation links: Storage Instances, Buckets, Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main area shows a table of objects within a specific bucket. The table has columns for Object name, Archived status, Size, and Last modified. The objects listed are img1.jpg, img2.jpg, img3.png, img4.jpg, img5.jpg, index.html, and style.css. The 'style.css' file is highlighted, and a tooltip shows its name. An 'Upload' button is visible in the top right corner of the object list area. The browser's address bar shows the URL for the object storage instance.
